To: Joseph Havasi &lt;havasij@compassminerals.com&gt;

Hi Joe,

I reviewed the annual report we received for GSL at the end of January. There are no new disturbance, reclaimed, or total disturbance acreages listed on it. Please have these filled out. Looking back through the records in our files, the last time we were provided acreages was 2011, with a total permitted/bonded acreage of 133,992. Thanks for helping out with this. If you have any questions, please let me know.

Thanks Joe.

On a side note, I received a Cultural Resources report today from SWCA dated February 2009 for the Twin Hills Project. I didn't request it. Do you know what that would be about? I haven't seen anything else come in the door for Twin Hills.

Thanks again, have a good weekend.

Hi Mike,

An exploration permit application was delivered to DOGM by our consulting geologist early last week to drill a couple of coreholes on our Twin Hills lease site, located just south of Lakeside in Box Elder County.

Best

Joe

Hi Joe,

I haven't seen that application make it to my desk yet. If it was submitted last week, I'll probably see it any day now.

Paul Baker normally collects the mail each day. I only saw the CR report come in because I had to pick up the mail last Friday and just happened to intercept it before it was given to admin to enter it into our tracking system. I likely won't see it again for a week or so.

Thanks, I'll keep an eye out for the application.

Joe,

The CR report says this Twin Hills site is on SITLA land. Do you have the SITLA Lease number(s) for this property?

Thanks,

Hi Mike,

The lease is attached. The Lease Number is ML-51502.

Best,

Joe

Thanks. SITLA should review the CR report with their in-house archaeologist. We take their review as gospel. Have you submitted it to them?

Yes, they have had it for five years or so. They sent it over to DOGM to review for the Exploration Permit.

Best

Joe

I checked the SITLA website for comments on this lease. They have one comment from Dec., 2008 on the lease approval, terms, royalties, etc. The only other comment is from Nov. 2011 about the legal description and map creation. Neither comment said anything about archaeology. I may have to get in touch with them.

On SITLA land, they always take the lead on CR reviews, which we're happy to allow. They have an in-house archaeologist, we don't. Letting SITLA complete the review bypasses our having to write a letter and get concurrence from SHPO.

Thanks, I'll let you know if I have any questions.  
I still haven't seen the exploration NOI yet...
